

## Scandinavian Christmas Star Ornament

### Materials

4 strips of Christmas fabric 10 inches by 3 inches  
iron  
spray starch  
chopstick  
Gold thread (to hang the star)

Fold and press each strip in half lengthwise, then fold each half in towards center. Use spray starch and press.

Fold each one so that the bottom is 2 inches longer than the top. Arrange in this configuration.

Loop each piece around the raw ends that are closest. Thread the last one through the last loop.

Tighten it and it will look like this. All the strips should be similar in length but they don't have to be exact.

Turn it over.

Fold tails up and over and weave the last one through.

First step to begin the first star point.

Turn the whole thing over and make triangle as shown.

Fold triangle in half back on itself.

Push raw edge through with a chopstick. Create a star point for each of the strips.

Sew a gold thread into the star to make a loop to hang the star.
